GORILLA COVERS

Gorilla Cover stands as the unrivaled choice or car protection, featuring a precisely customized design.

Every Gorilla Cover is one-of-a-kind, meticulously recreating all aspects of the vehicle, courtesy of its exclusive 3D digital layers system.

FLEXSHIELD TEX

Durability: Our FlexShieldTex is known for its strength and resilience. It can withstand wear and tear, making it suitable for the best car cover fabric.

Wrinkle Resistance: FlexShieldTex fabric has excellent wrinkle resistance, allowing covers or items made from this fabric to maintain a smooth and neat appearance even after extended use or storage.

Stretch and Recovery: One of the notable advantages of FlexShieldTex fabric is its inherent stretchability. It provides a comfortable and flexible fit, allowing for freedom of movement. Additionally, it has excellent recovery properties, meaning it returns to its original shape after stretching.

Easy Care: FlexShieldTex fabric is relatively low maintenance and easy to care for. It is machine washable, quick-drying, and does not require ironing due to its wrinkle-resistant nature.

Color and Print Retention: FlexShieldTex fabric holds color well, maintaining vibrant and long-lasting hues. It also allows for excellent print clarity, making it suitable for intricate or bold designs.

Water Resistance: Our HydroVentTex fabric has water-repellent properties, making it suitable for outdoor or water-related activities. It helps to keep the wearer dry and comfortable by resisting water absorption.

Overall, HydroVentTex & FlexShieldTex fabric offers a combination of durability, comfort, flexibility, and ease of care.

HYDROVENT TEX

Crafted from a fusion of ultra-fine polyurethane and elastane, the unique fabric seamlessly merges stretchability and durability, effortlessly conforming to the contours of every vehicle.

Enhanced with water-repellent treatment, it also ensures exceptional resistance to water, dust, and stains, maintaining a pristine appearance.

Forilla **COVERS**

FLEXSHIELD TEX

As the epitome of woven fabric, it seamlessly merges the distinctive qualities of Polyester with the high-performance capabilities of advanced technical fabrics.

FLEXSHIELD DOUBLE

The FlexShield fabric is amplified twofold, meaning the cover is now made with a double layer

HYDROVENT TEX

By incorporating a specialized treatment between the outer and inner layers, you get unparalleled protection against water splashes and even the outdoor elements.

PRODUCTIVITY

The Gorilla Cover stands alone as the sole product in the market that combines premium Guard Tex with advanced technical fabrics. It is meticulously tailored to perfection and offers complete customization options to meet individual preferences.

Our Fabrics generates a consistent microclimate within the car by virtue of its hygroscopic properties.

FlexShieldTex / HydroVentTex

The breathable and natural attributes of our covers facilitate air circulation, ensuring an environment of balanced airflow that helps preserve the car's condition.

FlexShieldTex / HydroVentTex

The Fabric acts as a thermoregulator, providing insulation and safeguarding the car against temperature fluctuations.

FlexShieldTex / HydroVentTex

The fabric undergoes a water repellent treatment, enhancing its exceptional performance both indoors and outdoors.

HydroVentTex

The gentle layer of Fabric ensures a scratch-free experience.

The outer layer undergoes a stain-resistant treatment, ensuring a performance that remains free from stains.

HydroVentTex

It effectively prevents the accumulation of electrostatic energy.

As the ultimate thermo-regulator, it effectively balances temperature fluctuations, safeguarding battery life in the process.

It provides protection against the sun's UV radiation.

Being a natural insulator, it eliminates the need for heating in the car storage area, resulting in energy and CO2 savings.

It offers impeccable defense against dust and sand.

From start to finish, every aspect of its creation, from conceptualization to design, material selection to manufacturing, is meticulously crafted in SA, ensuring a 100% "Made South Africa" product.

OPERATION

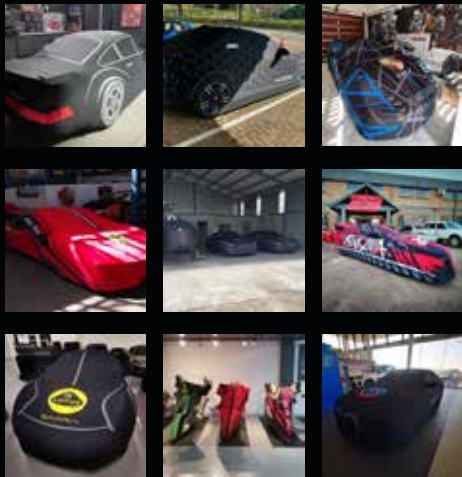

An end-to-end digital workflow, spanning from concept to development, is implemented for luxury handcrafted products. Utilizing 3D models, the cars' designs are faithfully reproduced, accentuating the distinctiveness of their contours with remarkable precision.

This is made possible by proprietary software derived from the Aerospace industry.

The utilization of premium materials and advanced digital printing techniques allows for the precise replication of graphics and colors from the original livery with unparalleled accuracy.

This level of precision enables limitless customization possibilities.
